The following is a statement of reasons for the indication of allowable subject matter:

The prior art does not disclose or suggest a method for modifying the electrical properties of a papermaking composition or broke in a papermaking system, or a method of reducing the amount of chemicals introduced to a papermaking composition, wherein the method includes a step of substantially adjusting a value associated with an electrical property of the papermaking composition or broke by introducing carbon dioxide to the papermaking composition or broke. Each claimed method recites at least this feature.
